

# ***Net\_Dérive***

*Participative Locative Media work*

**Atau Tanaka  
Petra Gemeinboeck**

2006

Net\_Dérive was made possible thanks to a grant from the French Minister of Industry RIAM program (Agence Nationale de la Recherche - ANR), as part of the Mosomuso (Mobile Social Music Software) project.

It was presented in October 2006 in Paris France as part of Sony CSL Paris' Intensive Science (<http://www.csl.sony.fr/Events/IntensiveScience/>) exhibition at the Maison Rouge gallery in Paris.

Atau Tanaka, conception, composition

Petra Gemeinboeck, conception, visual design

Ali Momeni, development

Lorys Pognon, mobile phone development

Jens Lofberg, interactive graphics

Gary Tunak, project intern

Mosomuso consortium partners:

Sony Computer Science Laboratory Paris

Clicmobile SA

Université de Paris 6, LIP6

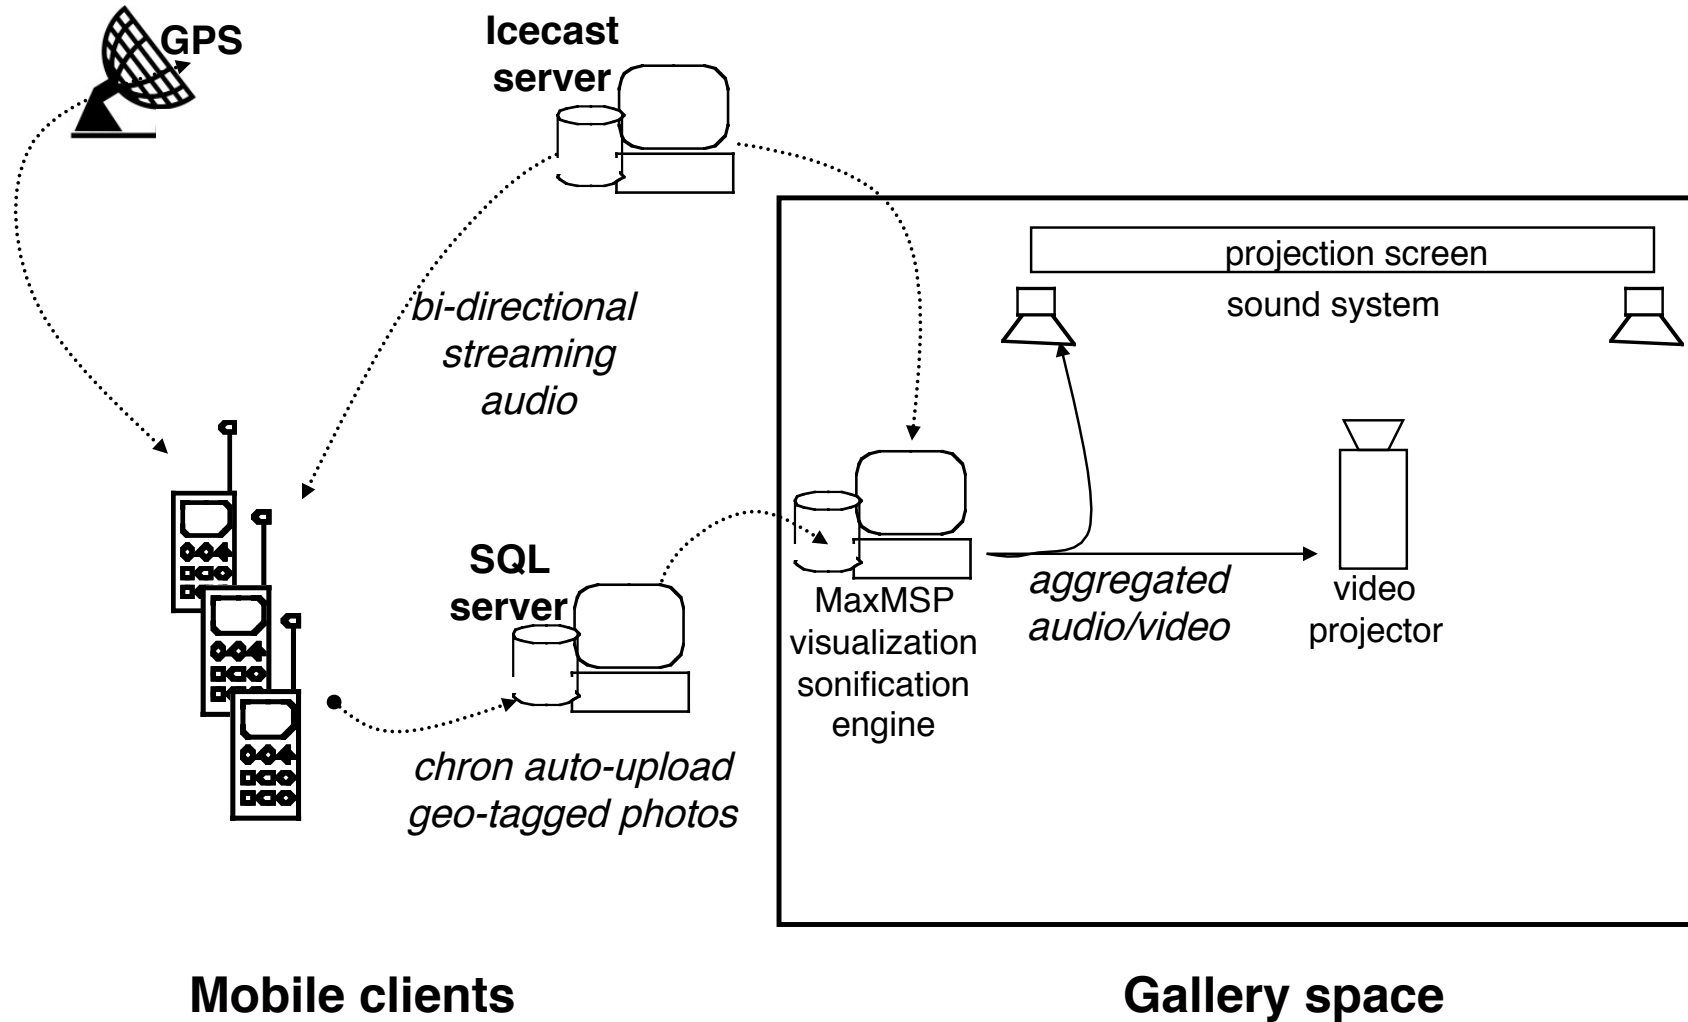

***Net\_Dérive*** is a location sensitive mobile media work that calls for an exchange between spectators in a gallery and three (3) participants in the streets of a city. Deployed on advanced mobile phones, the work seeks to create a kind of musical instrument based around the idea of the the city-as-instrument.

To perform the work, participants are given a wearable computing scarf with a mobile phone in each end and GPS unit on the back. They then go out on foot to explore the neighborhood surrounding the gallery. One of the phones is an acquisition device and takes photographs every 30 seconds and also collects sounds continuously. This media data is geo-tagged (associated with GPS coordinates) and uploaded to the server inside the gallery space over a 3G network connection. The second phone is a display device, and gives visual feedback onscreen and sonic output over headphones. The performers can see themselves pictured on the phone's screen as dots on a radar screen or by switching modes, they can view images taken by the cameras mapped along the trajectories walked by the participants.

The sounds and pictures collected in the streets become the information and materials for visualization and sonification of the participants locations and movements. They are mapped on to a 3D satellite map projected on a wall in the gallery. A soundscape is generated from the GPS coordinates: Participants' relative proximity giving a pulse of polyrhythmic blips, certain latitude/longitude combinations triggering voice commands directing the walkers to stop, continue, or turn, and absolute distance to command central (the gallery) modulating resonators shaping the audio feeds from the streets. This audiovisual amalgam is seen and heard in the gallery and streamed back out over 3G to the participants' mobile clients.

As users walk around and explore the city, they hear the voice instructions (to be heeded or not...), shifting rhythmic blips, and processed street sounds. The voice instructions -as well as the concept of the piece- are inspired by Situationist games and theory of the *Dérive* brought into the digital and mobile spheres. The soundscape becomes a context-sensitive music that is an abstraction of the collective experience, at once a representation of the situation, and an aesthetic orchestration giving the participant a sense of floating above the city streets - at once in a bubble yet more aware of their surroundings.

The simultaneity, history, and memory of the various users' paths and images become an collective narrative that is knitted together in the projection in the gallery space. This creates an archaeology of the instant, into which we carve grooves to develop alternative modes of reading and forms of representation that produce liminal, hybrid spaces, from which relations, yet unknown, can emerge.

**Directions**

Go left  
 Go left now  
 Turn left  
 Turn left here  
 Turn around and go left  
 You should take a left here  
 It is recommended that you take a left here  
 It'd be better if you took a left here  
 Please take a left here  
 It'd be better if you took a left here

Go right  
 Go right now  
 Turn right  
 Turn right here  
 Turn around and go right  
 You should take a right here  
 It is recommended that you take a right here  
 It'd be better if you took a right here  
 Please take a right here  
 It'd be better if you took a right here

Go west  
 Go east  
 Go north  
 Go south  
 Go for three minutes to the west  
 Go for two minutes to the north  
 Go for four minutes to the east  
 Go for one minute to the south

Follow the street  
 Cross the street  
 Cross the street and turn around  
 Cross the street and turn left  
 Cross the street and turn right  
 You cannot turn left here  
 You cannot turn right here

**Other ways of walking**

Go faster  
 Slow down  
 Vite – vite!  
 Stop here!  
 Don't stop here!

**Questions**

Did you take a left?  
 Why didn't you take a left there?  
 Did you take a right?  
 Did you turn around before you took a right?  
 Did you see the guy in the window?  
 Do you see the woman in the window?  
 Do you see the red car?

**Location specific directions**

Cross rue de Lyon here  
 Cross both rue de Lyon and avenue Daumesnil  
 Turn into rue Cremieux

(av Daumesnil/rue Rollin)      turn left here  
 (av Rollin/rue de Charenton)      turn right here  
 (rue Charenton/Traversiere)      take a left (here)  
 Place d'Aligre is straight ahead  
 (pl d'Aligre)      turn left  
 This is where Charles Baudelaire meets Theophil Roussel

Cross rue de Faubourg Saint Antoine  
 and follow the passage de la Main d'Or

Go down left at rue charonne  
 Vite-vite – pass avenue Rollin and proceed to Café Pause  
 Don't go down avenue Rollin –  
 take Le Passage de la Bonne Graine instead

**Location specific questions**

Did you see rue cremieux?  
 Did you miss the passage de la Bonne Graine?  
 Did you miss the passage de l'homme?

**Event specific directions**

You have a possible rendezvous with another participant  
 You are about to leave the Net\_Dérive zone  
 You have left the Net\_Dérive zone  
 Turn around – you are about to leave the Net\_Dérive zone

**Event specific questions**

Would you like a rendezvous with another participant?  
 Are you ready for a rendezvous with another participant?  
 Do you see the other participant?
